

Foreword

Interest among U.S. exporters in selling agricultural products to Japan has grown significantly in recent years. In 1978, Japan—the largest single-country market for U.S. agricultural products—imported nearly \$4.4 billion, compared with \$1.2 billion in 1970. U.S. exports of fresh and processed fruits and vegetables to Japan alone amounted to nearly \$327 million in 1978. Success in the Japanese market is predicated upon complete, reliable market information in order to undertake effective market development activities. This guide—the second of a planned series—is an attempt to broaden the information base for new-to-market exporters as well as U.S. exporters currently exporting fruit and vegetable products to this important, expanding market.

This guide contains the latest information available at the time of printing. It is important to note that it does not constitute a legal document. Since Japanese tariffs, plant quarantine regulations, and food laws are subject to change, it is recommended that U.S. exporters confirm this information with this office or the Office of the U.S. Agricultural Counselor in Tokyo.

The author wishes to express his appreciation to the U.S. Agricultural Counselor and his staff for their excellent cooperation in the collection of the information in this guide, particularly Assistant Agricultural Attaché W. John Child, Agricultural Specialist Kuniharu Kiyomiya, and Marketing Advisor Kunio Uyeno.

A Guide For U.S. Exporters of Fresh and Processed Fruits and Vegetables to Japan

By Michael L. Humphrey
Horticultural and Tropical Products Division
Commodity Programs
Foreign Agricultural Service

Japan is the largest single-country market for U.S. agricultural products. In 1978, the United States exported a record \$4.4 billion worth of agricultural products to Japan. This represented approximately 15 percent of the \$30 billion in U.S. agricultural products exported to all countries in that year. Of the record exports to Japan in 1978, U.S. exports of fresh and processed fruits and vegetables amounted to nearly \$327 million.

On a value basis, the nine leading U.S. fruit and vegetable items exported to Japan in 1978 (in millions of dollars) were: Lemons and limes, \$67.8; grapefruit, \$36.2; shelled almonds, \$33; raisins, \$21.9; oranges, \$20.9; onions, \$13.3; potato flakes and granules, \$12; canned peaches, \$11.1; and frozen french fries, \$8.4.

Excellent marketing opportunities exist today to expand U.S. exports of fresh and processed fruits and vegetables to Japan, despite the numerous import requirements, complex distribution system, high cost of promotion, import quotas on certain items, and food and health regulations. Prospects for U.S. processed food items such as french fries and canned corn improve steadily because of the gradual shift of the Japanese diet toward Western foods. The development of the fast food industry has greatly contributed to this change. Further access to the market has risen recently because of the lower duties negotiated in the Tokyo Round of the Multilateral Trade Negotiations and increases in the import quotas on certain items.

Through the joint efforts of U.S. agricultural industries and the U.S. Government, barriers to increased access are being overcome. In addition to improving market access, U.S. Government agencies, including the Foreign Agricultural Service, will continue to provide support for U.S. industries to undertake market development activities in Japan. With this cooperation, U.S. exporters may take advantage of expanding market opportunities.

This guide is intended to provide U.S. exporters of fresh and processed fruits and vegetables with the following basic market information:

- General economic information on the country, such as domestic production of certain items, household expenditures for fruits and vegetables, and wholesale prices;
- Plant quarantine restrictions, tariffs, import quotas, imports of selected items in the period 1973-78, U.S. market shares, and normal import seasons for various fresh items;
- Japanese laws affecting the importation of fresh and processed items;
- Description of the Japanese distribution system;
- Japanese importers, associations, and trading companies;
- Agencies of the U.S. Government that can provide assistance.

JAPAN: A Market Profile

People

Population: 115 million (1978).

Labor force: 55.3 million (1978).

Annual growth rate: 1 percent.

Density. 306 people per square kilometer (793 per square mile).

Life expectancy. Male—71.8 years; female—77.0 years.

Distribution: About 45 percent of the total population is concentrated in the major metropolitan areas of Tokyo, Osaka, and Nagoya.

Major cities: Tokyo (capital, population 8.5 million); Yokohama (2.7 million); Osaka (2.7 million); Nagoya (2.1 million); Kyoto (1.5 million); Kobe (1.4 million); Sapporo (1.3 million).

Geography

Total area: 37.7 million hectares (90.5 million acres).

Cultivated area: 5.5 million hectares (13.2 million acres).

Economy

Gross National Product (GNP): \$941 billion (1978).

GNP at constant 1970 prices: \$510 billion (1978).

Per capita GNP: \$8,162 (1978).

Unemployment rate: 2.3 percent (1978).

Exchange rate (yen per dollar): Yen 217 (July 1979)
Yen 217 (1978 average)
Yen 270.5 (1977 average).

Annual growth rate: 5.7 percent (1978)

Expenditures on food as a percent of disposable income:

Farm households, 14.5 (JFY* 1977)

Nonfarm households, 22.6 (JFY* 1977)

*Japanese fiscal year (April 1—March 31.)

Agriculture

Average farm size: 0.9 hectare (about 2.25 acres).

Major products: Rice, vegetables, fruit, meat, milk, and natural silk.

Foreign Trade

Total agricultural imports: \$12.6 billion (1977).

Total fruit and vegetable imports: \$933.3 million (1977).

Total fruit and vegetable imports from the United States: \$257.5 million (1977).

U.S. agricultural exports to Japan: \$4.4 billion (1978).

U.S. fruit and vegetable exports to Japan: \$326.3 million (1978).

Leading U.S. fruit and vegetable exports to Japan (1978) (in millions of dollars)

Lemons and limes	\$67.8
Grapefruit	\$36.2
Shelled Almonds	\$33.0
Raisins	\$21.9
Oranges	\$20.9
Onions	\$13.3
Potato flakes and granules	\$12.0
Canned peaches	\$11.1
Frozen french fries	\$ 8.4

Major Competitors: Fresh fruit and vegetables—Taiwan, New Zealand; canned fruits and vegetables—South Africa, Australia, Taiwan, Philippines.

In 1978, U.S. farm exports to Japan accounted for about 15 percent of total U.S. agricultural exports.

Japan purchases about one-third of its food and fiber needs from the United States.

Japanese agricultural exports to the United States are less than 1 percent of its total exports to the United States.

According to the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF) statistics, Japan imported about 55 percent of its caloric intake of food in 1976, compared with 22 percent in 1960.

Trade Policy

The Japanese import structure includes ad valorem and specific duties, import quotas on certain fruit and vegetable items, and an import licensing system. Duties on imports of fruit and vegetable items range from 5 percent to 55 percent ad valorem, depending on the product and import period. Import quotas, a major market access problem for U.S. exporters and other foreign exporters, are placed on oranges, tomato products, canned pineapple, most juices, and certain pulps and pastes. Import permits, which are issued by authorized Japanese foreign exchange banks, must be obtained by a Japanese importer prior to shipment. If the item to be imported is under an import quota, the importer must also obtain an import quota certificate from the Ministry of International Trade and Industry.

Under the Japanese import structure, the Government strictly enforces a plant quarantine law to prevent foreign plant diseases and injurious insects from entering the country. Likewise, the Government strictly enforces food and health laws to protect the health of the people and to insure safe foods. The above laws, apparently intended to protect the public health and environment, frequently also serve as severe barriers to trade. It is generally believed among exporters that these laws are mainly devices to restrict trade in an effort to protect domestic industries.

As a result of the Tokyo Round of the Multilateral Trade Negotiations, the Government agreed to lower duties on certain fruit and vegetable items, to increase import quotas on certain fruits and juices, and to establish certain codes to facilitate the conduct of international trade. For further information on the proposed duty changes, see page 26. At the time of printing, the final version of the duty reduction was still pending ratification by the Government of Japan.

Outlook

Excellent marketing opportunities exist in Japan today to increase U.S. exports of fresh and processed fruits and vegetables. Japanese importers and trading companies are seeking to buy a wide variety of processed foods and fresh items to satisfy growing demand. Development of the fast food industry has contributed greatly to this demand for processed foods, such as french fries, canned corn, frozen corn on the cob, and other frozen vegetables.

In addition to the impact made by the fast food industry, U.S. exporters may benefit from the lower tariffs on certain items that were negotiated through the Tokyo Round; for example, the duty on canned sweet corn will be lowered from 35 percent to 17.5 percent. Further, the import quotas on citrus will be substantially increased.

Japanese consumers recognize the importance of fresh fruits and vegetables in their diet. Although the demand for fresh items has increased, numerous barriers such as import quotas and strict plant quarantine regulations hinder expansion of the market. Food and health regulations restrict imports of processed foods. Some progress is being made to remove these barriers.

U.S. exporters should be aware that competition for the lucrative Japanese market will increase. U.S. exporters should make every effort to understand the complex Japanese marketing system in order to take advantage of this important market.

¹ Not separately classified.

² Separately classified beginning January 1, 1979.

³ Not elsewhere classified.

⁴ Not available. Effective January 1978, the U.S. export trade classification for juices was changed to express export statistics of concentrated juices in natural juice (single-strength) equivalents. However, some customs ports inadvertently continued to report exports in terms of actual gallons, i.e., without any conversion to a single-strength basis. The Bureau of the Census was not able to rectify the situation completely until January of 1979. Therefore, the quantities for 1977 and 1978 are not shown.

⁵ Quantity and unit are not given.

¹ Import status as of March 1979. ² Cherries must be fumigated in accordance with Japanese requirements. ³ All host fruits of the Caribbean fruit fly, *Anastrepha suspensa*, moving into Japan from Florida must be treated with ethylene dibromide (EDB). At present, treatment of EDB is approved only for citrus including lemons, limes, and mangoes. Other Caribbean fruit-fly host fruits from Florida should be considered prohibited. ⁴ Refer to specific items listed in this table.

¹ Duties applicable to U.S. products are in bold type. In the assessment of a duty, a preferential rate is applied before a GATT rate, a GATT rate before a temporary rate, and a temporary rate before a general rate. However, if a GATT rate is not lower than other rates, the applicable rate is a temporary rate, or if no temporary rate is provided, a general rate. Preferential rates primarily apply to developing countries and do not apply to the United States. ² Rates in parentheses indicate that such rates are not presently applicable. The rates actually applied may be reduced ones or other rates, as explained in footnote 1. Rates are applied to the c.i.f. price of the specified commodity unless otherwise indicated. ³ All imports of fresh fruits and their preparations are subject to food sanitation inspection upon arrival. ⁴ Customs Cooperations Council nomenclature used by most countries. ⁵ Prohibited except those fruits fumigated, in accordance with Japanese plant quarantine requirements. ⁶ Shipments from Florida are required to be fumigated with EDB for Caribby. ⁷ The size of the quota for 1979 Japanese fiscal year (April 1-March 30) is 45,000 MT, which will be gradually increased to 82,000 MT by JFY 1983, in accordance with an agreement between the United States and Japan. ⁸ Prohibited except those fruits fumigated, in accordance with Japanese plant quarantine requirements. ⁹ Enterable provided the item is kept under 0°F. ¹⁰ Quota for JFY 1978 was 2,000 MT (5:1 concentrate basis). ¹¹ Quota for JFY 1978 was 1,000 MT (5:1 concentrate basis) which will be gradually increased to 6,000 MT by 1983, in accordance with an agreement between the United States and Japan. ¹² Quota for JFY 1978 was 2,000 MT (5:1 concentrate basis). ¹³ Quota for JFY 1978 was 3,000 MT (5:1 concentrate basis), which will be gradually increased to 6,500 MT by JFY 1983, in accordance with an agreement between the United States and Japan. ¹⁴ Quota for JFY 1978 was 22,454 MT. ¹⁵ Quota has not been disclosed by the Government of Japan.

Preferential rates primarily apply to developing countries and do not apply to the United States. ² Rates in parentheses indicate that such rates are not presently applicable. The rates actually applied may be reduced ones or other rates, as explained in footnote 1. Rates are applied to the c.i.f. price of the specified commodity unless otherwise indicated. ³ All imported nuts and prepared nut products are subject to food sanitation inspection. ⁴ Customs Cooperation Council nomenclature used by most countries. ⁵ An import quota of 57,400 MT was issued for the 1978 Japanese fiscal year (April 1-March 30). ⁶ Walnuts in-shell are prohibited because of the codling moth.

Vermouths and other wines of fresh grapes flavored with aromatic extracts	2206000	90		126	180 144		Liquor tax law

¹ Duties applicable to U.S. products are in bold type. In the assessment of a duty, a preferential rate is applied before a GATT rate, a GATT rate before a temporary rate, and a temporary rate before a general rate. However, if a GATT rate is not lower than the other rates, the applicable rate is a temporary rate, or if no temporary rate is provided, a general rate. Preferential rates primarily apply to developing countries and do not apply to the United States. ² Rates in parentheses indicate that such rates are not presently applicable. The rates actually applied may be reduced ones or other rates, as explained in footnote 1. Rates are applied to the c.i.f. price of the specified commodity unless otherwise indicated. ³ All imported miscellaneous fruit and vegetable preparations are subject to food sanitation inspection upon arrival. ⁴ Customs Cooperation Council nomenclature used by most countries. ⁵ Import quota size not yet available from the Government of Japan.

Japanese Tariff Cuts Negotiated Through the Multilateral Trade Negotiations

At the time of printing, the Tokyo Round of the Multilateral Trade Negotiations had been completed, but the final version of the tariff duties was still pending ratification by the Government of Japan. When the ratification process is complete, the following proposed changes in the Japanese tariff schedule should occur:

Commodity	Tariff No.	Current duty	Proposed duty ¹
Fresh fruits.			
Avocados, mangoes, guavas	0801-441	10%	6%
Grapefruit			
Imported Jun. 1-Nov. 30	0802-300	20%	12%
Imported Dec. 1-May 31	0802-300	40%	25%
Grapes	0804-100	20%	² 13%
Lemons, limes	0802-100	10%	5%
Oranges			
Imported Jun. 1-Nov. 30	0802-200	20%	³ 20%
Imported Dec. 1-May 31	0802-200	40%	40%
Papayas	0809-090	10%	4%
Canned fruits.			
Fruit cocktail	2006-171	25%	14%
Peaches	2006-124	25%	⁴ 15% & 18%
Pears	2006-126	25%	18%
Pineapple	2006-111	72 yen/kg.	30%
Canned vegetables:			
Canned sweet corn, with added sugar	2107-130	35%	17.5%
without added sugar	2107-226	25%	12.5%
Frozen fruits and vegetables:			
Sour cherries, with added sugar	2003-090	35%	23%
Vegetables other than potatoes	0702-020	10%	³ 10%
Sweet corn	2107-225	25%	12.5%
Cranberries	0810-090	20%	10%
Juices:			
Orange, grapefruit, grape	2007-	(⁵)	(⁵)
Lemon	2007-	22.5%	10%

See footnotes at end of table.

Continued

Japanese Tariff Cuts Negotiated Through the Multilateral Trade Negotiations--Continued

Commodity	Tariff No.	Current duty	Proposed duty ¹
Dried fruit:			
Prunes	0812-010	10%	4%
Raisins, in containers weighing more than 10 kg. each, incl. container	0804-290	5%	2%
Nuts:			
Almonds			
Sweet	0805-410	9%	4%
Roasted	2006-293	20%	10%
Macadamia			
Fresh	0805-430	20%	12%
Roasted	2006-277	20%	10%
Walnuts	0805-200	30%	20%
Other processed products:			
French & salad dressings	2104-131	25%	15%
Sauces other than tomato, mayonnaise, french & salad dressings	2104-139	15%	12%
Vegetable soups, with added sugar	2105-111	30%	21%
Other soups and broths	2105-190	30%	21%
Miscellaneous products:			
Cut flowers & buds	0603-000	5%	Free
Wine of fresh grapes, other than champagne & sparkling wine, in containers not over 150 liters	2205-299	320 yen/liter	⁶ 55%

¹ The staging process for implementing these tariff reductions will begin April 1, 1980. By 1987, the full tariff reductions should be in effect. ² November 1—January 31. ³ Some duties were bound at existing rates. These duties can be changed only through negotiations. ⁴ A duty of 15% applies to peaches in cans over 2 kg. and 18% for other canned peaches. ⁵ Duties on citrus juices not previously bound under the General Agreement on Tariffs and Trade were bound. ⁶ Duty changes to 55% with a maximum of 280 yen/liter and a minimum of 150 yen/liter

Japanese Laws Affecting Importation of Fresh and Processed Fruits and Vegetables

Plant Quarantine Law.

This law imposes restrictions on imports of fresh fruits and vegetables to prevent foreign plant diseases and injurious insects from entering the country. A few of these restrictions on plants and unprocessed plant materials include.

- (1) Must be imported through designated seaports and airports;
- (2) Must be accompanied by a federal phytosanitary certificate issued by the country of origin;
- (3) Must not be imported through the mail, except in small samples, commercial samples or through the parcel post; and
- (4) Those received through the mail must be reported to a Plant Protection Station for inspection.

Various fresh fruits and vegetables may not be imported due to certain insects. For a detailed list of plant quarantine restrictions applicable to fresh fruits and vegetables from the Continental United States and Hawaii, see pages 12 and 16. Under this law issued by the Japanese Ministry of Agriculture Forestry and Fisheries, each shipment of fruits, vegetables, plants, trees and bulbs must be inspected on arrival. If a shipment is found to be infected by injurious insects or diseases, quarantine authorities are empowered to reject part or all of the shipment, or require treatment of shipment.

Imports of nursery stock such as fruit trees, plants, and bulbs are also subject to inspection at the time of importation. Samples of each item are grown at national quarantine farms where careful testing is performed to detect the presence of plant diseases.

Japanese Ministry of Health and Welfare authorities inspect horticultural imports closely for the use of unauthorized chemicals and sprays or excessive residues of chemicals. The U.S. exporter should be sure that only authorized treatments are used in preparing items for export and that these are applied according to approved procedures. Even packaging materials are closely inspected.

Japan Agricultural Standards (JAS) Law:

This law provides for standardization of container sizes and labelling requirements. Manufacturers must provide a minimum of information for the Japanese consumer. For example, added materials such as salt or food additives must be listed on the label by their most common name. Moreover, food is also subject to examination on a random basis.

Food Sanitation Law:

This law protects Japanese consumers from inferior or tainted foods and beverages. It provides standards for safety evaluation of pesticide residues in food, standards for food additives, and restrictions on use of food additives.

Note. For further information regarding Japanese plant quarantine regulations on fresh fruits and vegetables, contact the Animal and Plant Health Inspection Service (APHIS). This agency also inspects fruit and vegetable shipments for export and issues phytosanitary certificates to meet the import requirements.

For information regarding the clearance of processed food products, the Foreign Agricultural Service (FAS) offers a label clearance service.

The procedure is as follows send to FAS your label that indicates the ingredients of your product and FAS will then send it to the Agricultural Counselor in Tokyo for clearance from the proper Japanese authorities. A form with complete instructions is available. There is a \$5 charge per label.

You will be informed whether the product can be admitted or if approval might be given provided certain changes were made to the product. If changes are required, they are generally in regard to preservatives or additives.

For complete information on this service, contact.

Japanese Distribution System

Before entering a foreign market, a new-to-market firm should understand the distribution system of the country involved. The distribution system in Japan is widely known to be long and complex, thereby adding substantially to the costs on fruit and vegetable items that the consumer ultimately pays. The Japanese wholesale system consists of three or more levels. In the past, trading companies were largely responsible for importing fruit and vegetable items. However, direct selling is becoming more accepted in an attempt by Japanese firms to lower distribution costs and to expedite the movement of imported items. Urban retail stores in Japan consist largely of neighborhood outlets ("mom and pop" stores) and large department stores. The following diagram illustrates the general distribution pattern for domestic and imported fresh fruits and vegetables.

Japan: Diagram of the General Distribution Pattern of Fresh Fruits and Vegetables

DOMESTIC PRODUCTS

IMPORTED PRODUCTS:

Source: Based on information from the Japanese Industry and arranged by the Office of the Agricultural Counselor, Tokyo.

To better understand the Japanese distribution system, the following example illustrates the costs involved in importing citrus—oranges, grapefruits, and lemons.

Example of Distribution and Pricing of Imported Fresh Citrus, 1978

Item	Oranges ¹	Grapefruit (Florida)	Lemons (California)
Fruit count per carton	88	40	140
Port of arrival (yearly average c.i.f. price per carton)	\$10.00	\$ 8.00	\$11.00
Import duty (40% Dec.-May for oranges and grapefruit and 10% for lemons)	4.00	3.20	1.10
Total in dollars to this point	\$14.00	\$11.20	\$12.10
(Yen equivalent—converted at an ² (¥2,970) average exchange rate of ¥212.17 to \$1 for CY 1978)	(¥2,375)	(¥2,565)
Miscellaneous expenses: ¥450 per carton for unloading, warehousing, bank charges, etc.	¥ 450	¥ 450	¥ 450
Price to importer	¥3,420	¥2,825	¥3,015
Importer's normal margin	¥2,400 (70%)	¥ 140 (5%)	¥ 150 (5%)
Price to primary wholesaler	¥5,820	¥2,965	¥3,165
Primary wholesaler's markup	5%	5%	5%
Price to secondary wholesaler	¥6,110	¥3,110	¥3,320
Secondary wholesaler's markup	10%	10%	10%
Price to retailer	¥6,720	¥3,420	¥3,650
Retail price (per fruit)	¥ 150	¥ 120	¥ 45
Equivalent amount per carton received by	¥11,850	¥4,320	¥5,670
retailer after deducting estimated 10% decay	(\$55.85)	(\$20.35)	(\$26.70)

¹ Oranges sold under a quota system. ² ¥ represents yen.

Dallas, Tex. 75258
Tel: (214) 651-0839

Assistance for U.S. Exporters

The following list identifies those U.S. Government agencies that can provide various forms of assistance to U.S. exporters of fresh and processed fruits and vegetables. In addition, a partial list of air and sea carriers that service Japan is provided.

U.S. Department of Agriculture

Foreign Agricultural Service (FAS)

Deputy Director for Marketing
Horticultural & Tropical Products Division, FAS
Room 6603-S, U.S. Department of Agriculture
Washington, D.C. 20250
Tel: (202) 447-7931

... provides production and trade data on foreign markets and administers a variety of market development activities designed to assist U.S. fresh and processed fruit and vegetable exporters to promote their products in overseas markets. Numerous fruit and vegetable groups are represented in these programs. Another important area of activity is maintenance and improvement of foreign-market access for various products.

Director
Export Trade Services Division, FAS
Room 4945-S, U.S. Department of Agriculture
Washington, D.C. 20250
Tel: (202) 447-6343

... provides a full range of services for U.S. exporters of agricultural products, including the Trade Opportunity Referral Service (TORS), product testing, label clearance, taste testings in foreign countries, trade exhibits, food shows, and point-of-purchase promotions.

Agricultural Counselor
American Embassy
APO San Francisco 96503
Tel: 583-7141

... assists in carrying out various promotional programs such as point-of-purchase and hotel food shows for new products as well as for those established on the market. The Counselor also maintains close contact with trade associations, the Japanese Ministry of Agriculture, Forestry, and Fisheries, and present and potential importers of agricultural products. He can advise exporters on Japanese import regulations, trade barriers, and food laws.

Office of Transportation

Branch Chief
Transportation and Packing Research Branch
Office of Transportation, U.S. Department of Agriculture
Room 210, Building 006, BARC West
Beltsville, Md. 20705
Tel: (301) 344-2815

... conducts research on the packaging, handling, and transporting of all classes of agricultural products.

Branch Chief
International Transportation Services
Office of Transportation, U.S. Department of Agriculture
Room 1405, Auditors Building
Washington, D.C. 20250
Tel (202) 447-7481

... assists exporters with cost and service problems; participates in programs to inform and stimulate dialog between shippers and carriers on major transportation issues; and coordinates marketing and research activities of government and export groups.

Animal & Plant Health Inspection Service (APHIS)

Staff Office
Export Section, Regulatory Support Staff
Plant Protection and Quarantine Programs
U.S. Department of Agriculture
Hyattsville, Md. 20782
Tel. (301) 436-8537

... provides guidance on foreign plant quarantine regulations, inspects fruit and vegetable shipments for export, and issues phytosanitary certificates to meet entry requirements of the importing country.

Economics, Statistics, and Cooperatives Service (ESCS)

Deputy Administrator for Cooperatives
Economics, Statistics, and Cooperatives Services
U.S. Department of Agriculture
Room 550, GHI Building
Washington, D.C. 20250
Tel: (202) 447-8870

... concentrates on problems and opportunities unique to farmer cooperatives; conducts research studies analyzing export opportunities of cooperatives and the technical aspects of their export operations; and assists cooperatives, both individually and by group, to develop new export programs or improve existing programs.

Science and Education Administration (SEA)

Post Harvest Project Leader
Fruit Research Laboratory
SEA-AR
1104 North Western Avenue
Wenatchee, Wash. 98801
Tel: (509) 662-4317

... conducts research on apples, pears, cherries and other tree fruits. Emphasizes research to reduce product losses and production costs, and to improve the handling, storage, and transportation of fresh products to markets.

Laboratory Chief
Market Quality and Transportation Research Laboratory
SEA-AR
P.O. Box 8143
Fresno, Calif. 93747
Tel (209) 487-5334

... conducts research on almonds and other nut crops, citrus, deciduous fruits and also postharvest research on fresh vegetables.

Laboratory Chief
U.S. Horticultural Research Laboratory
SEA-AR
2120 Camden Road
Orlando, Fla. 32803
Tel: (305) 898-6791

... conducts research on citrus and subtropical fruits, and also postharvest research on fresh vegetables.

Research Leader
Market Quality Research Laboratory
SEA-AR
P.O. Box 267
Weslaco, Tex. 78596
Tel: (512) 968-5533

... conducts research on quality maintenance, deterioration, and spoilage in fresh citrus and other subtropical fruits and vegetables during handling, storage, and transportation.

Location Leader
European Marketing Research Center
Marconistraat 38 b
3029 AK Rotterdam, The Netherlands
Tel: 010 76 55 38
Telex: 26649 USARS NI

... conducts research on transport equipment and techniques, environmental control (refrigeration), and packing in shipping U.S. fruits, vegetables, grains, and meats to export markets.
